

The Sanyo Denki Super U 85W U508-012E paired with the Sumtak SLB-006-2000G encoder is a high-precision DC servo motor assembly rated at 75V, 1.7A, and 3000 RPM with a 2000 P/R optical resolution, available locally in stock via regional automation suppliers.

Technical Specifications

Motor Brand / Series: Sanyo Denki
Super U

Model Number: U508-012E

Power Output: 80W-85W

Voltage / Current: 75V DC, 1.7A

Speed: 3000 RPM

Feedback Encoder: Sumtak SLB-006-2000G

Encoder Specs: DC 5V, 80mA, 2000 P/R
(Pulses Per Revolution)
